June 4, 2008

To whom it may concern,

Flynn Enterprises, LLC and I have been associated with Keller Schroeder (KSA) for more that 10 years. Their support of our midrange system includes software development and design as well as support on purchased software. KSA has performed every midrange systems upgrade for us since 1997.

KSA also supports our EDI system and designed software to interface with all of our existing customers. This includes data transfer using AS2, FTP and dialup communications. KSA has designed applications to work beside and on the Microsoft platform.

KSA is knowledgeable of both hardware systems and the software that runs on them. Most of all they are dependable and easy to work with.
